

DeviceNet Functional Description and Troubleshooting

Who should attend?

This course is designed for those individuals in the semiconductor industry who require the knowledge and skills to operate and troubleshoot system that uses DeviceNet as a part of the control architecture.

Course Benefits

- Decreases time to competency for all technicians who need to operate and troubleshoot DeviceNet systems
- Increases overall knowledge of the operation of DeviceNet
- Provides the technical foundation necessary to work effectively with the DeviceNet

Course Objective Summary

- Identify and describe DeviceNet design and understand its architectural limitations
- Describe the characteristics of the equipment that uses DeviceNet
- Describe common DeviceNet problems and potential causes
- Describe the tools used for troubleshooting DeviceNet problems

Course Modules

1. *Overview*
2. *Troubleshooting Overview*

Registration Information

Prerequisites: *None*
Course Length: *2 Hours*
Course Type: *Web-Based Training*
Course Number: *TRAW1437b*

To enroll or for more information on our products and services, please call our registrar at one of the numbers below or go to www.appliedtraining.com.

- 1-800-468-8888, option 4 (United States)
- 1-512-272-0027 (International)

Computer System Requirements:

Attending this course requires a computer using Internet Explorer 5.5 or higher with the plug-in for Flash Player 9. For the audio portion of the class, headsets or speakers are required. 128MB RAM or higher, high-speed Internet access and a screen resolution of 1024 x 768 are also highly recommended.
