

## COMMON FRONT END (NATIVE) OPERATIONS AND PROGRAMMING

### Who should attend?

This course is designed for those individuals in the semiconductor industry who require the knowledge and skills to operate and program the Common Front End (Native) software implementation.

### Course Benefits

Improve knowledge of system operation, features, function, and procedures.

Improve performance monitoring and troubleshooting skills.

### Course Objective Summary

- Describe the function of the Common Front End (CFE) software and its benefits.
- Describe the function of the FLEX controller and the hardware requirements for CFE integration.
- Locate and describe the major software features of CFE.
- Locate and describe the function of the performance monitoring and troubleshooting screens.

### Course Modules

1. *Common Front End (Native) Overview*
2. *FLEX Hardware Overview*
3. *Common Front End (Native) Functionality*
4. *CFE (Native) Performance Monitoring and Troubleshooting*

### Registration Information

**Prerequisites:** *None*

**Course Length:** *5 Hours*

**Course Type:** *Web-based Training*

**Course Number:** *TRNWEB-165*

To enroll or for more information on our products and services, please call our registrar at one of the numbers below or go to [www.appliedtraining.com](http://www.appliedtraining.com).

- 1-800-468-8888, option 4 (United States)
- 1-512-272-0027 (International)

### Computer System Requirements:

Attending this course requires a Windows 98, NT, 2000 or XP computer using Internet Explorer 5.5 or higher. 128MB RAM or higher and high-speed Internet access is also highly recommended. For the audio portion of the class, headsets or speakers and a sound card are required.
