

MIRRA CMP OPERATIONS 4: ADVANCED OPERATIONS

Who should attend?

This course is designed for those individuals in the semiconductor industry who require the knowledge and skills to perform advanced operations in Mirra CMP software.

Course Benefits

Provide technical foundation necessary to work effectively with select software.

Provide understanding of installment, function, troubleshooting and operation for software applications.

Course Objectives

- Understand the file and folder structure used by the Mirra CMP software.
- Install the Mirra CMP software updates.
- Manage user access to the Mirra CMP software.
- Edit equipment constants.
- Access the look-up tables that store calibration information.
- Understand the software options used to debug and configure AIO, DIO, and MEI boards.
- Perform the software procedures needed to recover from an error in the Mirra CMP system.

Course Modules

1. *Software Installation*
2. *Managing User Access, Equipment Constants and Calibration*
3. *Debugging AIO, DIO, and MEI Boards*
4. *Error Recovery*

Registration Information

Prerequisites: None

Course Length: 1 hour

Course Type: Web-based Training

Course Number: TRNWEB-28

To enroll or for more information on our products and services, please call our registrar at one of the numbers below or go to www.appliedtraining.com.

- 1-800-468-8888, option 4 (United States)
- 1-512-272-0027 (International)

Computer System Requirements:

Attending this course requires a Windows 98, NT, 2000 or XP computer using Internet Explorer 5.5 or higher. 128MB RAM or higher and high-speed Internet access is also highly recommended.
